

Cold Chain Packaging Solutions Leader

EMERGENCY MEDICAL SERVICES

THERE'S NO GREATER FEELING THAN SAVING A LIFE

As an emergency medical services professional, you strive each day to live the code of ethics for EMS practitioners. But you need the tools to help you be successful. Peli BioThermal's temperature controlled packaging solutions keep life-saving blood products within a 1-10 degree Celsius temperature range required by many regulatory agencies, making it possible to treat critically ill patients pre-hospital.

The weight and space-saving design of Crêdo ProMed™ carry bag, which is built on Golden Hour™ technology and used to transport temperature-sensitive medical materials, is perfect for emergency vehicles strapped for space. The Crêdo ProMed™ carry bag is available in three sizes and uses TIC™ coolants filled with phase change material and vacuum insulated panels (VIP) to keep medical materials at the required temperature for up to 72 hours.

Sustainability

Rent. Reuse. Recycle. We're on a journey to protect our environment and our planet one package at a time.

Innovation

Our team thrives in the area between problem and solutions to develop cold chain packaging innovation.

Reliability

Our customers trust us with their most valuable, health-giving and life-saving products.

PELI
BIO THERMAL™

Thermal packaging technologies on a global scale

Peli BioThermal's innovative single-use and reusable thermal packaging products are used by leading global life science industry companies and organizations in pharmaceuticals, biotech, laboratory, diagnostics, and military/government sectors to protect and safely transport their most critical temperature-sensitive tissues, biologics, diagnostic devices and vaccines. We offer the most diverse and trusted selection of cold chain packaging solutions, worldwide manufacturing and service centers staffed by cold chain engineering experts and provide an easy-to-use, web-based asset management service that allows organizations to track individual shipments from start to finish while setting up automated reminders for key logistics processes.

PERFORMANCE YOU CAN DEPEND ON

All Peli BioThermal products are qualified against the highest standards, including the ISTA 7D standard.
