Crēdo PROENVISION

CRĒDO PROENVISION™ SOFTWARE

The Crēdo ProEnvision™ software is an easy-to-use track and trace web-based software program designed to manage your reusable Crēdo™ shippers.

TRACK Utilising a customisable scan in/scan out process, the convenient tracking application identifies location and status of shippers and assists in identifying metrics such as return rates, number of uses and component replacement.

TRACE Your own customisable management reports detail maintenance and offer a complete history of where your shippers have been and how long they have been in service. Provision of aging and maintenance reports offer a clearer view of when to replenish, repair or replace a shipper. Inventory and return percentage reports analyse which client locations are returning shippers for re-use and which have not yet.

WHY CHOOSE CRĒDO PROENVISION™?

- Logistics support
- Maximise shipper recovery
- Reduce Total Cost of Ownership
- Key performance metrics

- System updates are performed live and online by our support team
- Easy to use, convenient program integration
